

# BOSCH AD300

## AutoDome PTZ Camera System

Bosch's AutoDome modular camera system is a revolutionary new concept in dome cameras. More than just a series of cameras, it's a dome platform built around a system of intelligent, interchangeable modules that allow you to update camera functionality quickly and cost effectively.

Using common components lets you install a basic camera system today and migrate to a more advanced version tomorrow without having to replace the entire dome, thus protecting your initial investment.

The entire AutoDome system is based on five interchangeable modules: the CPU, camera, housing, communications, and power supply. Swap one of the interchangeable modules and quickly upgrade from analog to IP, color to day/night, or add motion detection.

## Features

- High-speed PTZ dome
- Fully interchangeable CPUs, cameras, housings, communications, and mounts
- Choice of 540 TVL 36x day/night camera with
- 128x wide dynamic range or 26x and 18x day/night cameras
- Optional hybrid operation provides simultaneous analog (coax) and IP connectivity
- Advanced privacy masking
- Advanced alarm control with rules engine
- UTP transmission standard on all analog models
- Cable compensation extends cabling distances
- Multi-protocol capable
- Three-year warranty
