

STM/ATM, STS/ATS

Swarovski Optik Telescopes

Swarovski Optik telescopes provide outstanding image quality for observation. At the same time they function as high-power telephoto lenses delivering matchless photos. Vivid, true to life and diamond bright.

Features:

- Razor-sharp, high-contrast images right up to the image periphery
- Shortest focusing distance of 3 meters (10 ft) for accurate observation of the minutest detail.
- Rugged aluminium housing with rubber armouring
- With 'Easy to Clean' - the new coating for trouble-free cleaning
- All models available in high-definition

See next page for options

Specifications:

	STM80	ATM80
• Objective lens	80 mm	"
• Shortest focusing dist.	5 m (16 ft)	"
• Diopter correction at ∞	> 5 DPT	"
• Optical elements	7	"
• Objective filter thread	M82x0.75	"
• Tripod thread	0.25 in UNC; 0.375 in UNC	"
• Length approx.	33.5 cm (13.2 in)	35.5 cm (14 in)
• Weight approx.	1195 g (42.2 oz)	1230 g (43.4 oz)
• Weight HD-vrsn, approx.	1270g (44.8oz)	1280g (45.2oz)
• Operating temperature	-20° C / +55° C	"
• Storage temperature	-30° C / +70° C	"
• Submersion tightness	4 m (13 ft)	"
• Objective lens focal length	46 cm (18.11 in)	"

ATM/STM, ATS/STS

Digiscope Options

Universal Camera Adapter (UCA)

A single adapter for compact and digital single lens reflex cameras. Suitable for all SWAROVSKI OPTIK telescopes. For a quick change from observation to photography and with the added benefit of being extremely secure, steady and compact. It is also incredibly light at only 350 grammes. The newly developed UCA from Swarovski Optik leaves nothing to be desired.

Part Number UCA

Digital Camera Base (DCB)

With one simple up and down pivoting movement, the Swarovski Optik DCB digital camera base makes it possible to switch between observation mode and photography mode in a matter of seconds. The DCB can be fitted very easily to the observation telescopes of the STM/ATM 80/65 (HD) and STS/ATS 80/65 (HD) series and is the perfect solution for spontaneous photography.

Part Number DCB

Eyepieces

30x wide-angle eyepiece, 20-60x Variable or 25-50x wide-angle zoom - with eyepieces from Swarovski Optik you will be perfectly equipped for any situation.

All Swarovski Optik eyepieces are watertight and compatible with telescopes of the ATM/STM, ATS/STS series and the CTS. A glass cover protects against dust and dirt even when the eyepiece is removed. The bayonet connector for quiet and easy change of eyepieces, the automatic safety mechanism guards against accidental unscrewing of the eyepiece. In addition, all eyepieces have protective eyepiece covers.

Part Number 25-50x W & 20-60x

Digital Camera Adapter (DCA)

Experience nature with the telescope. With your camera attached to the DCA, it can stay in your pocket protected from wind and rain until you wish to take a photograph. With a few small movements the digital camera is attached to the telescope eyepiece just prior to taking the photo. The DCA digital camera adapter melds camera and telescope into a sturdy single unit.

Part Number DCA

Window Mount

Swarovski Optik Window Mount for use with Swarovski Binoculars, Spotting Scopes and other tripod adaptable accessories. Firmly attaches to any car or truck window for a steady viewing platform.

Part Number Window Mount

Tree Screw Mount

The Tree Screw Mount is suitable for all Swarovski Optik telescopes. Ideal for stable observation without a tripod.

Part Number Tree Screw Mount
