

Universal Night Sight™

The Universal Night Sight (UNS) is optimized for use with medium-range sniper weapons, assault rifles, and machine guns. Patented technology allows the UNS to maintain permanent boresight retention for the life of the unit.

Features:

- Installs and removes without affecting boresight, eliminating the need for adjustment
- Large 40 mm output optic
- Installs on any MILSTD 1913 rail in front of day sight; requires no additional equipment
- Fast f/1.15 Catadioptric Lens Provides a Brighter and Sharper Image in Starlight

Specifications:

- System Resolution (Omni 4- 6 tube): 4 cy/mr typ.
- Focusing Range: 25 m to infinity
- Magnification: 1X
- Boresight deviation: >1 minute
- Boresight repeatability: Within 1 minute
- Designed using MIL-STD 810E as a guideline
- Saltwater Resistant
- Fully operational after submersion: To 67 feet
- System Length (with baffles): 203 mm (8 in)
- Diameter: 76 mm (3 in)
- Weight: 32 oz (2 lb)
- Generation III, Omni IV, "Clean Tube" (no spots)
- Resolution: 64 lp/mm
- Photocathode Sensitivity (Min): 1800 uA/lm
- Signal to Noise Ratio (Min): 21
- Figure of Merit: 1600
- Variable Gain Control
