Zodiac Hurricane 1300 MACH II

Mated to four 350 HP outboard engines, the boat is designed with an aluminum hull/ deck and fitted with a dual console which has a pilot and navigator in the forward position, and a communication and team commander position for the aft console. The boat has a removable roof, and a folding mast with lift assist/fall protection. The ZH-1300 OB has a maximum speed of 55 knots, and with its fuel capacity of 1910 liters, it can traverse 350 nautical miles at 35 knots.

Night Navigator 6065

Currents Night Navigator 6065 integrates a cooled thermal imager (MWIR) with 22x optical zoom and HD day / low light camera 30x optical zoom. Rugged and marinized, it provides 360° situational awareness, detects NATO target as far as the horizon and tracks targets from multiple sources (radar cursor, ARPA, AIS and video target) while navigating at high speed day and night. Manufactured in Canada, this compact, gyro-stabilized electro-optical system requires minimal maintenance and is the new preferred EOS for fast interceptors & USV worldwide.

ABOUT CURRENT

Current Scientific Corporation is the Canadian manufacturer of the Night Navigator™ electro-optical camera systems designed for marine applications. Night Navigators are mounted on paramilitary vessels, coast guard, SAR, offshore specialty ships such as icebreakers, seismic research, scientific exploration, mega-yachts, USV and HSC. Choice of configurations include cooled and uncooled thermal imaging, HD day, lowlight, night vision, SWIR, laser range finder and non-lethal deterrent laser dazzler. Rugged, marinized, low maintenance.

ABOUT ZODIAC MILPRO

The Zodiac Milpro and Zodiac Hurricane brand names identify our reputation which is built upon our commitment to meeting the needs of military or civil customers anywhere in the world. We are extremely strong in the military segment and are number one in our niche market. Our boats and products are unmatched in capability, and that's because we have invested in technology which sets us apart from our competition. Operators like the French Navy Commandos recognize our capabilities and are using our platforms all around the world.
